

## “What began with a warm recommendation grew into a valuable place within DFD.”

*Marloes Bakker - Bakker – Head of administration*

Marloes has been employed at Dutch Farm Design since January 2022. Her journey with us began thanks to her former colleagues, who knew her well — her work style, her qualities, and her way of collaborating. They saw exactly what value Marloes could bring to the team and connected her with DFD. A step that turned out to be a perfect match for both her and the company.

Within DFD, Marloes is primarily responsible for administration and finance. In addition, she handles general operational matters as well as HR-related tasks, giving her a broad and versatile role. It is a position in which she can fully apply her accuracy, sense of responsibility, and organisational talent.

Since joining the company, Marloes has experienced significant growth — both professionally and personally. She has developed into a reliable cornerstone within the organisation, someone who contributes to the smooth operation and success of DFD on multiple levels. Her role has become essential in the daily workflow.

What does Marloes appreciate most about DFD? She is genuinely proud to be part of this team. Although the company is small, DFD works on major projects all over the world. This makes the work not only challenging but also highly inspiring. The combination of down-to-earth teamwork, ambition, and commitment makes Marloes feel completely at home here.
